Check & Adjustments Only

Our Results & Findings

Work Order: This is your Quarterly Inspection. **NO CHANGE FROM PREVIOUS REPORT.**

Notes/ Findings: The technicians were onsite and were "Not" able to complete the wet check. Since there was "NO POWER" to the Clock at all. We need you to check the breaker inside of the house, and if that still does not work, then you might have to contact an electrician if not. The technicians would like to check the and the functionality of the Clock on their next trip. Please let us know how you would like to proceed.

THE MONTH OF AUGUST: Working outdoors in Florida's August heat requires careful planning to ensure worker's safety and well-being. The hot and humid weather, while challenging, also promotes rapid plant growth, leading to a continuous need for mowing, trimming, and other maintenance services.
