Our Results & Findings

Work Order: This is your requested visit for a suction line that broke in the Lake.

Notes/ Findings: The technicians were onsite to complete the repairs on 09/05/25 and they were onsite for 1 hour and 30 mins. Our techs had to dig to carefully dig to expose the pipe, so they were able to carefully cut the damaged section, so they are able to replace it with the correct clamps for proper connection. Once they secure the connection, they had to test the system. Below we will list everything they needed to complete the repairs. Your Clock and Pump are both Functioning properly. They Cleaned and adjusted your Sprinklers. They have left your Clock on the "AUTO" Position, so the grass does not dry out or start to have brown areas. You are functioning properly. 😊

Breakdown of Repairs for Approved Request

5 ft PVC Pipe 1 1/4" Inch

2x 1 1/2" Inch 90's

2x 1/2" Inch 90's
